

The Customer is
the raison d'être core
of the business

EKÄMM

represents a new form of **global Disruptive Innovation Engineering Solution company**, driven by Lean methodologies to make the Customer the raison d'être and core of the business thereby **bringing engineering, manufacturing and logistics closer to the customer**.

Achieving, through reducing intermediaries, made possible by a firsthand understanding of the needs of the customer/market. Delivering, by **offering the best possible technical, commercial and economical solutions** directly applicable to the requirements.

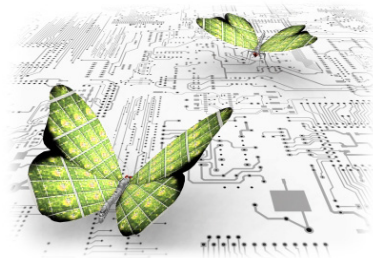

Ekämm contains **two divisions**; The first is focused on **Engineering and Supply Chain solutions services** and the second in **assessed On-Line Distribution**, both based on very strategic partnerships and alliances.

- Design engineering Hardware and Software, electrical, electronics and mechanical, Including manufacturing and logistics
- Project management both onshore and offshore
- Product technical management
- Product manufacturing and international distribution together with partners in alliance:

- Turnkey projects and sourcing
- Commercialization strategy
- Marketing and field engineering support
- Panels and showcases
- Launching packages and catalogs

Existing product portfolio

- Energy efficiency solutions —◦ presence & movement detection, programmable/astronomic timers, thermostats...
- Quality of Energy solutions —◦ modular automatic system for reactive energy compensation, electronics regulators, cabinets, capacitors...
- Measurement Instruments —◦ multimeters, digital power clamp meters, network analyzers, high voltage meters...
- Signalling devices —◦ beacons, stack light, sirens, buzzers, horns , electronic sounders...
- Installation material —◦ DIN clamps, Terminal Strips, cable ties...
- Connectivity solutions —◦ terminal lugs, hand-held and hydraulic cable cutters, strippers and crimpers...
